

Graphing Lines in Slope-Intercept Form

Sketch the graph of each line.

1) $y = \frac{1}{4}x - 1$

2) $y = -x + 2$

3) $y = x + 1$

4) $y = \frac{4}{3}x - 4$

5) $y = -3x - 3$

6) $y = 4x$

**CFS:**

- 1. Equation is annotated for y-intercept and slope**
- 2. Slope and y-intercept are annotated on graph**
- 3. Line for equation is graphed on coordinate grid**
